AGENDA / SPEAKERS

PROGRAM OVERVIEW

The program is specifically designed to enhance current knowledge about Pharmacovigilance, adherence, and management of cardiovascular disease. We will discuss new strategies for the management of atrial fibrillation, stent complications, and the use of catheter ablation. In addition, we will discuss new strategies for the management of atrial flutter, including the use of catheter ablation. We will also discuss the use of catheter ablation for the treatment of atrial fibrillation, including the use of catheter ablation for the treatment of atrial flutter. We will also discuss the use of catheter ablation for the treatment of atrial flutter, including the use of catheter ablation for the treatment of atrial flutter. We will also discuss the use of catheter ablation for the treatment of atrial flutter, including the use of catheter ablation for the treatment of atrial flutter. We will also discuss the use of catheter ablation for the treatment of atrial flutter, including the use of catheter ablation for the treatment of atrial flutter. We will also discuss the use of catheter ablation for the treatment of atrial flutter, including the use of catheter ablation for the treatment of atrial flutter. We will also discuss the use of catheter ablation for the treatment of atrial flutter, including the use of catheter ablation for the treatment of atrial flutter.

LEARNING OBJECTIVES

- Identify the role of Advanced Practice Nurses in acute care tertiary hospital setting
- Identify the role of Advanced Practice Nurses in acute care tertiary hospital setting
- Identify the role of Advanced Practice Nurses in acute care tertiary hospital setting
